Hands-on

CTF FOR OSCP

ADVANCED NETWORK PENTESTING

Are you preparing for the OSCP-PEN 200 certification and seeking to refine your Capture The Flag (CTF) skills? Our exclusive training program is meticulously designed to equip you with core technical knowledge and hands-on expertise in real-world attack scenarios. Led by seasoned cybersecurity professionals with decades of industry experience, this program offers a structured pathway to OSCP success.

Ignite's trainers have achieved a 100% OSCP pass rate for their students, ensuring top-tier results through expert mentorship and hands-on training.

Komal Rajput - 13+ Years of Experience

Red Team Lead | Threat Hunter | Bug Bounty Expert | OSCP Mentor

Komal Rajput is a highly accomplished in penetration testing, red teaming, and threat hunting. She used to report and mitigating advanced security threats for Fortune 500 companies and government agencies. With a deep understanding of both offensive and defensive security, she brings a holistic approach to cybersecurity training.

Renowned for her live, interactive training style, Komal ensures real-world application of techniques through hands-on Capture The Flag (CTF) challenges and simulated attack scenarios. Her sessions are designed to be engaging, problem-solving driven, and **exam-focused**, making complex concepts easy to grasp.

Beyond technical expertise, she is known for her patience, approachability, and **commitment to student success**, going the extra mile to mentor candidates even outside scheduled sessions.

Trainer Rating: ★★★★★

Raj Chandel – 22+ Years of Experience

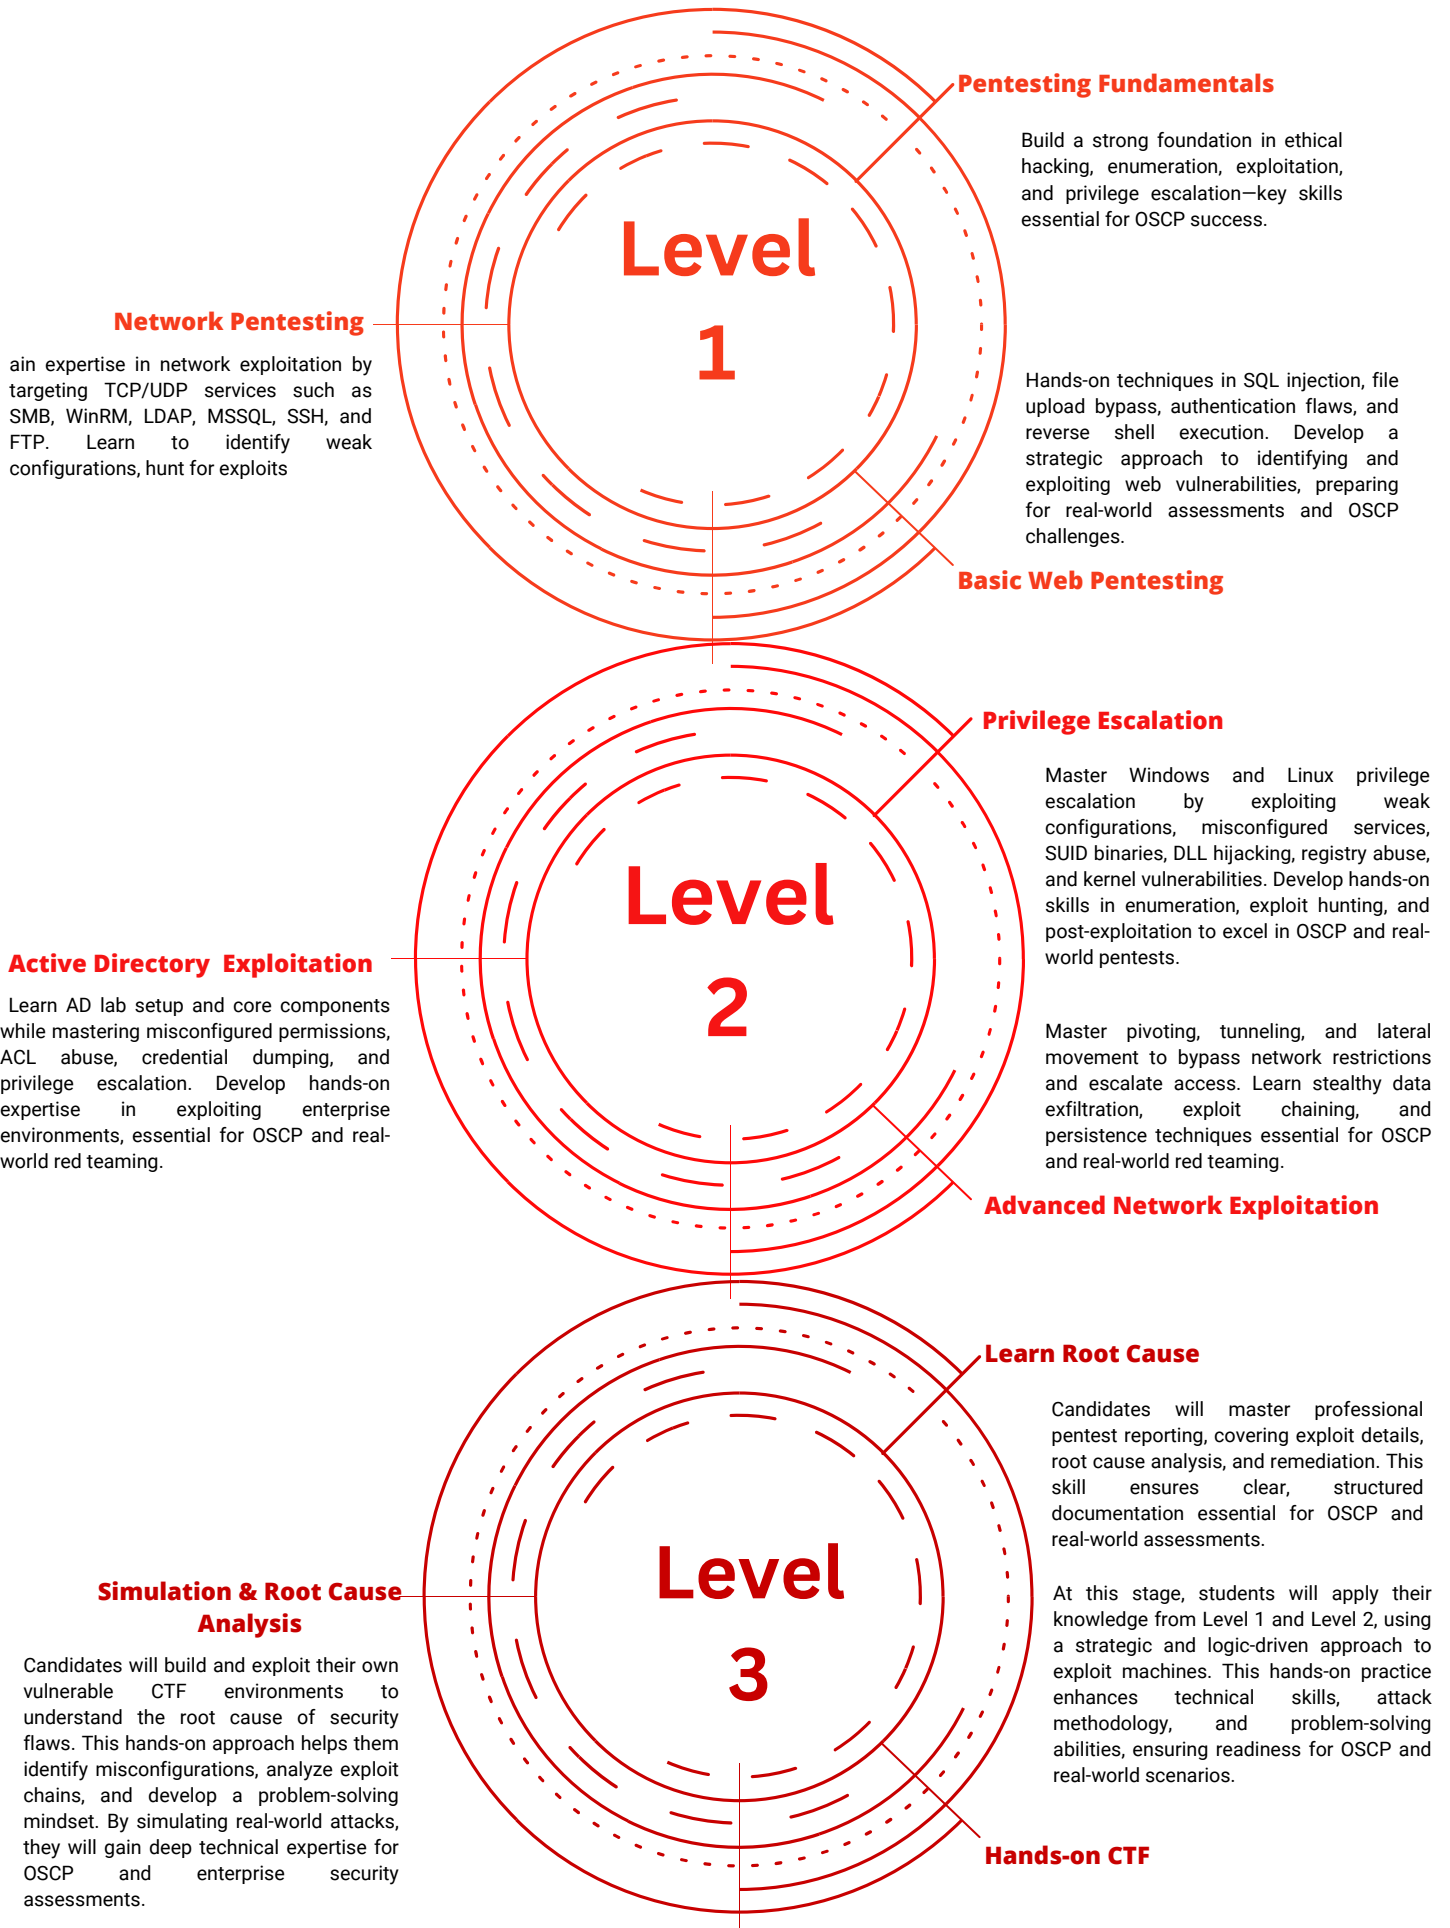

Founder of Hacking Articles | Red Team Strategist | Social Engineering & Digital Forensics Expert | Solution Architect | Career Mentor

Raj Chandel is a seasoned cybersecurity leader with over two decades of experience in offensive security, red teaming, and digital forensics. As the founder of Hacking Articles, he has shaped the careers of thousands of cybersecurity professionals worldwide. His expertise extends to digital forensics, enabling organizations to investigate and respond to sophisticated cyber threats.

His interactive sessions **emphasize problem-solving**, persistence, and tactical execution, ensuring candidates develop the mindset and skills required **to excel in challenging certification exams**.

Beyond technical mastery, Raj is a **trusted career mentor**, known for his practical, results-driven training approach, guiding professionals toward OSCP success and cybersecurity excellence.

Trainer Rating: ★★★★★
